PACKING OF EXHIBITS

Exhibitors shall be responsible for the consequences of improper packing

A. Protection against Damage and Rain

As the exhibits are repeatedly loaded and unloaded during transportation, shocking/bumping will sometimes be inevitable. Moreover, exhibits will be placed outdoors many times, including open-air storage at the exhibition centre before and after the exhibition. Therefore, exhibitors must take necessary precautions against damage and rain, since we cannot assume any responsibility for the damage, especially when the return exhibits are to be packed with used-packing materials (the case as well as aluminium foil, plastic covers, etc., very often would have been damaged already during unpacking).

B. The Case

The case must be strong enough to avoid damage during transportation as well as unpacking, and in particular, be suitable for repacking and for sale for return movement after the exhibition. Packing in cartons is not considered suitable for repeated handling, especially for valuable or delicate equipment.

CASE MARKINGS

For easy identification of exhibits, all packages must be marked as follows:
